(a) Sign Area and Dimensions.

Sign area shall include the entire face of the sign from edge to edge, including any frame or structure around the perimeter of the sign, provided, however, that a proportional framing or structure around the display area may be excluded by the Planning Commission.

- (1) For a sign comprised of individual letters, figures or elements on a wall or similar surface of a building or structure, or an irregular shaped free-standing sign, the area of the sign shall be the area of not more than three (3) adjacent regular geometric shapes that encompasses the perimeter of all the elements in the display. Regular geometric shapes are squares, rectangles, circles, ovals, triangles, and trapezoids.
- (2) When separate elements are organized to form a single sign, but the elements are separated by open space, the area of the sign shall include the space between the elements.

SIGN AREA—COMPUTATION METHODOLOGY

(3) For free-standing signs:

- A. The sign area shall be computed by the measurement of one (1) of the faces when two (2) identical display faces are joined, are parallel or are within 30 degrees of being parallel to each other and are at no point separated by a distance that exceeds two feet.
- B. The portion of a solid sign base, up to a maximum height of two (2) feet,

may be excluded from the calculated sign area provided such base is adequately screened by landscaping as determined by the Planning Commission.

- (4) Air between a projecting sign and the wall to which it is attached and detached lighting fixtures and associated brackets shall not be included in the calculation of sign area.

(b) **Sign Height.**

The height of a free-standing sign shall be measured from the average natural grade at the base of the sign or support structure to the tallest element of the sign or its support structure. A free-standing sign on a man-made base, including a graded earth mound, shall be measured from the average site grade prior to any grade change in the area of a sign.

(c) Building Frontage and Building Unit.

For the purposes of these sign regulations, the length of the building wall that faces a public street other than a limited access highway or that contains a public entrance to the uses therein shall be considered the building frontage.

- (1) The building frontage shall be measured along such building wall between the exterior faces of the exterior side walls.
- (2) In the case of an irregular wall surface, a single straight line extended along such wall surface shall be used to measure the length.
- (3) A building is considered to have two frontages whenever the lot fronts on two or more streets or the building has a public entrance on a wall other than the wall that faces the street. The property owner shall determine which wall shall be the primary building frontage and which wall shall be the secondary building frontage. Only one outside wall of any business shall be considered its primary frontage and only one additional wall considered its secondary frontage.
- (4) For multi-occupant buildings, the portion of a building that is owned or leased by a single occupant shall be considered a building unit. The building frontage for a building unit shall be measured from the centerline of the party walls defining the building unit.

- (b) All signs shall be constructed, erected and maintained in accordance with the Village Building and Housing Code.
- (c) All signs, including temporary signs, shall at all times be maintained in good condition and repair at all times. Upon determination that a sign is not being maintained, is in poor condition or repair, or is unsafe, the Building and Zoning Inspector or his designated agent may order such sign to be brought into compliance or removed within a specified time period. Should the property owner fail to bring the sign into compliance as directed, the Building and Zoning Inspector may remove (or cause to be removed) or maintain such sign at the expense of the person, firm or corporation who erected the sign or on whose premises it was erected, affixed or attached. Each such person, firm or corporation shall be individually and separately liable for the expense incurred in the removal of the sign. The Building and Zoning Inspector may

also institute an injunction, mandamus, abatement, or other appropriate action or proceeding to prevent, enjoin, abate, or remove such violation.

- (1) Signs may be internally illuminated with LED's or similar technology, provided that the sign shall be factory set so that the luminance of the sign shall not exceed a maximum of three (3) foot candles measured ten (10) feet from the sign's face at maximum brightness. Internally illuminated signs shall be equipped with a reduced intensity nighttime setting device activated by photocell or timer.
- (2) External illumination of signs shall not be of excessive brightness and shall be designed and shielded so as to prevent glare and minimize light trespass onto adjacent properties and to prevent view of the light source from any adjoining residential property and/or vehicles traveling on public rights-of-way. In no instance shall the intensity of the light exceed twenty (20) foot candles at any point on the sign face.
- (3) Signs may use back lighting or halo lighting subject to the approval of the Planning Commission.
- (4) No sign shall be illuminated between the hours of 2:30 a.m. and 5:00 a.m., unless the activity displaying the sign is open for business during those hours. The Building and Zoning Inspector is authorized to grant an exception from the provisions of this section to any activity in which illumination of signs during the hours otherwise proscribed is necessary or desirable for the security and safety of the activity or for property in the custody of the activity.
